

## ***Supporting Asthma Education in Montana***

Established in 2007, the Montana Asthma Control Program seeks to:

- Improve the quality of life for all Montanans with asthma
- Increase the quality of self management education provided to patients with asthma in our state

Our program supports providers who seek Asthma Educator Certification (AE-C). To become a certified asthma educator, providers must take the National Asthma Educator Certification Review Board (NAECB) Certification Exam. For more information about the NAECB exam visit: [www.naecb.org](http://www.naecb.org)

Though the Asthma Control Program cannot cover the cost of taking the NAECB exam, our program provides resources and assistance to healthcare providers who desire to become certified asthma educators. Our services are listed on the inside of this brochure and include:

- Free study materials
- A mentoring program where current AE-Cs in Montana field questions about the exam
- Asthma education certification review courses

### ***What do asthma educators do?***

According to the NAECB website, an AE-C is "an expert in counseling individuals with asthma and their families how to manage their asthma and minimize its impact on their quality of life."

### ***Who do asthma educators serve?***

8.8% of Montana adults and 11.1% of children in the state are affected by asthma. As a common and increasingly prevalent chronic disease, most clinicians will see asthma regularly in their practice, no matter how small.

### ***How can I network with other AE-Cs?***

The Montana Asthma Control Program is committed to facilitating opportunities for AE-Cs in the state to come together, network and learn. To this end, the program sponsors conference calls and face-to-face meetings for AE-Cs across the state. Contact the Asthma Control Program if you are interested in participating.

## Test Preparation Assistance

### Resource Library

The Montana Asthma Control Program (MACP) maintains a resource library with free study materials for the NAECB exam. To help you prepare for the exam, our program loans out copies of these resources including:

- *The AAE National Asthma Educator Certification and Recertification Review Course*: These audio CDs are designed to help prepare asthma educators to

take the National Asthma Educator Certification Board (NAECB) exam. The course syllabus contains slides, notes and case studies that accompany the audio recordings of a live review course. The course content is based on the NAECB detailed outline for the asthma certification examination.

- *The Asthma Educator's Handbook* : A comprehensive resource for anyone wishing to take the NAECB exam, this

book covers a range of asthma education topics and includes mini exams at the end of each chapter that simulate the types of questions likely to appear on the NAECB exam.

To loan out these free resources contact [asthmainfo@mt.gov](mailto:asthmainfo@mt.gov) or call 406-444-9155.

### Mentoring

The Asthma Control Program coordinates a mentoring program where healthcare providers who are already Certified Asthma Educators answer questions for individuals who are studying for the exam. If you wish to have a mentor, the

Asthma Control Program will take your contact information and give it to an existing AE-C who will be available by phone or e-mail to answer your questions regarding the exam. This free, informal program can increase your confidence in your ability to pass the NAECB exam.

If you would like to be linked with a mentor, contact [asthmainfo@mt.gov](mailto:asthmainfo@mt.gov) or call 406-444-9155.

### Asthma Educator Review Courses

In the spring of every year, the MACP sponsors a live course for health professionals engaged in asthma education. These courses are taught by faculty from the national Association of Asthma

Educators. Odd years (2011, 2013 and so forth) the MACP sponsors the half day course *Becoming and Asthma Educator and Care Manager*. Even years, the MACP sponsors the day and a half course *The AAE National*

*Asthma Educator Certification and Recertification Review Course*. All courses offer continuing education units for nurses, respiratory therapists and pharmacists.
